## 371LM

### LiftMaster 371LM Remote

Our basic single-button remote control isn't so basic. It can operate a single garage door or gate, or turn your garage door opener lights on/off. You can also use it as an extra remote control to turn on lights or small appliances inside your home – all from the comfort of your car. It features Security+® rolling code technology that sends a brand new code every time it is used. One 5-year 3-volt battery is included.

**The MHz frequency of your garage door opener will determine what remote controls will work with your system. See below to find out which remote to order.**

### Order the 371LM if:

- Your garage door opener motorhead has a [purple learn button](#), or
- Your garage door opener motorhead has a purple antenna, or
- Your original remote has silver buttons with glowing blue lights, or
- Your original remote has black buttons and this logo:
